 - *Parental Martyrdom and the Myth of the Free Ride:* Why do so many people prioritize financing their children's education ahead of their own retirement? The answer has far more to do with psychology than finance. Deep values about parenting, cultural norms, and outdated/debunked beliefs about what kids need in order to be successful can all interfere with sound money management in this area.

This talk will go to the core of these messages and beliefs, debunking false narratives and replacing them with sound reasoning.

 - *Invest like YOU: Take a sustainable approach with ETFs:* Sustainable investing is about investing in progress and recognizing that companies solving the world's biggest challenges may be the best positioned to grow. Join Sarah Kjellberg, Head of iShares Sustainable ETFs, as she takes a deep dive into why we should consider sustainability when it comes to long term investing. Sarah will uncover the importance of environmental, social and governance (ESG) issues, and how iShares Sustainable ETFs can help investors pursue long-term performance and solve for a range of investment objectives. Learn why it's time to think sustainable first.
